

Error:

ORA-00001: unique constraint (APEX_230200.WWV_DICTIONARY_CACHE_OBJ_IDX2) violated

Solve:

You will need to refresh data dictionary cache. Here's how:

- navigate to "Administration" (upper right corner, left of your username) **(Step 1)**
- click "Manage Service" **(Step 2 & 3)**
- in lower right corner, you'll see "Manage Meta Data" **(Step 4)**
- click on "Data Dictionary cache" **(Step 4)**
- finally, "Refresh Cache only" **(Step 5)**

APEX App Builder SQL Workshop Team Development Gallery

↑ **Manage Service**

Manage Service

Make a Service Request
Request access to a database schema, additional storage, or to terminate the workspace.

Set Workspace Preferences
Configure functionality available to developers within this workspace.

Define Workspace Message
Define the workspace message.

Define Environment Banner
Define the workspace-level banner that is displayed on all pages.

Workspace Utilization
View the workspace summary report, including schema and activity details.

Manage Extension Links
Configure workspace extension links that will be shown in the Extensions menu in the builder's navigation bar.

About

Use the Manage Service page to manage service requests, configure workspace preferences, edit announcements, view reports, clear log files and cached content, manage workspace metadata.
